     Map data after object module synopsis:
                                                                              00:00:00.14
                                                                                                  00:00:00.17
     Symbol table output:
                                                                              00:00:00.01
                                                                                                  00:00:00.61
Total run values:
                                                                              00:00:01.98
                                                                                                  00:00:19.64
Using a working set limited to 1050 pages and 66 pages of data storage (excluding image)
Total number object records read (both passes): 330 of which 98 were in libraries and 2 were DEBUG data records containing 133 bytes
Number of modules extracted explicitly
    with 3 extracted to resolve undefined symbols
6 library searches were for symbols not in the library searched
A total of O global symbol table records was written
